Supplementary Figure 1. Quantile-Quantile (QQ) plots of body mass index (BMI) (kg/m squared) for all individuals. The black diagonal line is the line of equality (y=x) between the baseline and subsequent years. The baseline year is 1993. The vertical dashed lines represent clinical cutoffs for overweight status (BMI ≥ 25 kg/m squared) and for obese status (BMI ≥ 30 kg/m squared).
