Supplemental Figure 1. Flowchart of participants
Supplemental Figure 2. Muscle strength score per quartile of protein distribution (CV) by follow-up time in men (n= 827) (A) and women (n= 914) (B). Values are mean ± SEs, adjusted for level of education, disease burden, total protein, BMI, depression score (GDS), cognitive status (3MS), smoking, mid-arm muscle area (MAMA), and age; using mixed model analysis. *P-trend <0.05 by ANOVA. T1, 1st-y; T2, 2nd-y; T3, 3rd-y follow-ups; Q, quartile.
Supplemental Figure 3. Chair stand time per quartile of protein distribution (CV) by follow-up time in men (n= 827) (A) and women (n= 914) (B). Values are mean ± SEs, adjusted for level of education, disease burden, total protein, BMI, depression score (GDS), cognitive status (3MS), smoking, mid-arm muscle area (MAMA) and age; using mixed model analysis. *P-trend < 0.05 by ANOVA. T1, 1st-y; T2, 2nd-y; T3, 3rd-y follow-ups; Q, quartile.
