Online Supplemental Figure 5. Proportion of anemic preschool children with iron deficiency based on infection burden group

- **Very high infection burden**
  - Anemia: 68.1%
  - Iron deficiency: 22.4%
  - Iron deficiency anemia: 18.0%
  - Proportion of anemic children with iron deficiency: 26%

- **High infection burden**
  - Anemia: 56.9%
  - Iron deficiency: 37.5%
  - Iron deficiency anemia: 27.2%
  - Proportion of anemic children with iron deficiency: 48%

- **Medium infection burden**
  - Anemia: 18.0%
  - Iron deficiency: 17.2%
  - Iron deficiency anemia: 4.2%
  - Proportion of anemic children with iron deficiency: 23%

- **Low infection burden**
  - Anemia: 2.4%
  - Iron deficiency: 10.5%
  - Iron deficiency anemia: 1.2%
  - Proportion of anemic children with iron deficiency: 50%
