FIGURE LEGEND
Figure 1: Hunger (A), fullness (B), nausea (C) and bloating (D) during 60-minute intraduodenal infusions of 0.5 kcal/min (P0.5), 1.5 kcal/min (P1.5), 3 kcal/min (P3), or saline control (C). Data are means ± SEM; n=16, treatment*time interaction analysed using repeated measures ANOVA; Significant differences (P<0.05) determined by post-hoc comparisons using Bonferroni's correction.
