RE: "ANTIBIOTIC EXPOSURE BY 6 MONTHS AND ASTHMA AND ALLERGY AT 6 YEARS: FINDINGS IN A COHORT OF 1,401 US CHILDREN"

Risnes et al. have reported two errors in Table 1 of their article (1) and would like to provide corrections. First, on the continued page of Table 1 found on page 5, in the row for “Gestational age, weeks, <37,” the values 11.2, 1.83, and 1.15, 3.14 for “Yes, %,” “OR,” and “95% CI” in the last three columns should be instead 12.8, 1.11, and 0.56, 2.10, respectively. Second, at the end of the stub column entry, “Diagnosis of respiratory problem in NICU,” there should be a superscript “c” to tie this row descriptor to the corresponding footnote below that indicates number. Neither of these corrections changes any main results or conclusions. The authors and the Journal apologize for these errors.
