Erratum

Gershon et al. (1) report 3 minor errors in Table 2 of their recently published article in the Journal. In the last column, “% Change From 1996 to 2005,” under “No. With Asthma,” in the first 3 rows (≤4 years, 5–9 years, and 10–14 years) of the “Overall” group, the values were incorrect. The table below contains the correct values. None of these corrections changes any main results or conclusions. The authors and the Journal apologize for these errors.

ACKNOWLEDGMENTS
Conflict of interest: none declared.
