Information for Contributors

The American Journal of Epidemiology publishes original field and laboratory contributions on infectious and non-infectious acute and chronic diseases and related statistical studies. Editorials, reviews and comments on various aspects of epidemiologic research and letters to the editor are also published.

Copyright. It is understood that when a manuscript is submitted to the Journal it is not under consideration for publication elsewhere. Upon acceptance by the Journal, a paper may not be submitted elsewhere for simultaneous or later publication, whether as a whole or in shorter version, without written permission of the Journal. Published manuscripts are the sole property of the Journal, copyrighted in the name of the Johns Hopkins University School of Hygiene and Public Health.

Manuscripts. Authors are advised to consult the detailed instructions for preparation of manuscripts, available by request from the editorial office. Manuscripts should be double-spaced on one side of 8 1/2 x 11-inch paper. The original and two complete copies, including tables and figures, are required. The cover letter should be in duplicate. Include phone number in cover letter.

Abstract and Keywords. A current issue of the Journal provides a general guide to the format of manuscripts. An abstract not exceeding 200 words and a list of not more than 8 keywords are published with each article in the Original Contributions section. Biological Abstracts carries directions for the preparation of abstracts in its January issue each year. Keywords should be selected as far as possible from a current copy of the National Library of Medicine's Medical Subject Headings (MeSH).

Abbreviations. An alphabetical list of abbreviations used in the paper, and their meanings, should be supplied. Abbreviations should be defined the first time used in the text.

References. References are consecutively numbered (in parentheses) in the text. The list of references should be double-spaced and should follow the style of Index Medicus. Inclusive pages are required.

Tables and Figures. Tables should be numbered in the order in which they are mentioned in the text. Glossy prints of line cuts and half-tones are required. If figures or tables are taken from a previously published paper (whether the author's or another's), the contributor must provide written permission from the copyright holder.

Charges. Effective June 1, 1976, authors will be charged $50 per page for printed pages in excess of 4. (Multi-part papers in a single issue are considered a single contribution in computing charges for printed pages over 4.) Because of financial restrictions, waiver of excess page charges can be granted only in cases of undue hardship (requests for waiver of page charges must be made at the time the manuscript is submitted). A flat rate of $20 is charged per article for author's alterations; additional charges may be assessed for changes in tables and figures and lengthy or numerous changes in text.

Reprints. Authors are requested to order enough reprints to meet anticipated needs. Published manuscripts may not be reproduced without permission of the Journal. If the supply of reprints is exhausted, the author should contact the Journal office for rate schedules and specific permission to reproduce.

SPECIAL NOTICE TO SUBSCRIBERS

To help our subscription service:

— If you write to us about your subscription (e.g., to inform us of a change of address) please enclose a mailing label from an old issue or provide in full both your old and new addresses and name, and include the four-digit ID subscription number.

— If an issue is late, please allow three months from publication date before requesting a replacement.

Back Issues

Back issues for 1975 and 1976 are available through the Journal office.

American Journal of Epidemiology
615 N. Wolfe Street
Baltimore, Maryland 21205 USA

Volumes 67–100 (1958–1974) are available from
Kraus Periodicals
Route 100
Millwood, New York 10546 USA

Volumes 1–66 (1921–1957) are available from
Johnson Reprint Company

INFORMATION FOR SUBSCRIBERS

The American Journal of Epidemiology is published monthly, two volumes of six issues appearing each year. Subscriptions are on an annual basis and are entered to begin with the January issue. Renewals are billed in advance of the calendar year. US, $40.00 (single issues $4.00); foreign, $45.00 (single issues $5.00).

Special subscriptions, which do not replace regular institutional subscriptions, are available to members of: American College of Preventive Medicine; American Epidemiological Society; Epidemiology and Veterinary Sections of the American Public Health Association; Association of Teachers of Preventive Medicine; Epidemic Intelligence Service; International Epidemiological Association; Section of Neuroepidemiology of the American Academy of Neurology; Association for Practitioners in Infection Control. (The special rate ($20.00 US, $22.50 foreign) in no way implies sponsorship of the Journal by the above organizations). The American Journal of Epidemiology is sponsored by the Society for Epidemiologic Research; a subscription to the Journal is included in membership dues. (For information regarding membership in the SER, write to Dr. Steven H. Lamm, Secretary-Treasurer, Society for Epidemiologic Research, 2423 Tunlaw Road NW, Washington, DC 20007, USA. Dues for the society are $20.00 US and Canada and $25.00 foreign, and should be sent to the Journal office.)

Full-time students in schools of public health may subscribe at $10.00 per year.

Microfilms of the Journal are available from Waverly Press, Inc., Mt. Royal and Guilford Avenues, Baltimore, MD 21202, USA.

Address all subscription and editorial correspondence to: American Journal of Epidemiology, 615 North Wolfe Street, Baltimore, MD 21205, USA.

Second-class postage paid at Baltimore, Maryland 21202, and at additional mailing offices.

What you DON'T know, could hurt them!

The transmission of Hepatitis B within the hospital, constitutes an occupational hazard to medical/health care personnel; and is of special concern to surgical teams, blood bank and laboratory employees, renal dialysis staff, and autopsy/morgue personnel. Although the relative risks of hepatitis vary from hospital to hospital, and even within hospital departments, the problem—to some extent—confronts virtually every health care institution in the country.

Blood and blood products are major risk factors for Hepatitis B; however, the presence of antigen in other biological fluids serves to emphasize the increased risk of exposure to infection and the importance of handling ALL patient specimens and waste material with utmost care.

Hepatitis Control:
sound protection for your hospital

To protect patients and personnel, an increasing number of hospitals are adopting recommended hepatitis controls based on a program of education, detection and implementation. In cooperation with leading medical consultants, Abbott Diagnostics Division has prepared a variety of educational and training materials for distribution to hospitals and interested professionals. The series includes:

• audio-visual presentation and printed summary
• physician's guide to Hepatitis B
• folder of administrative guidelines
• pamphlet and wall chart outlining lab precautions
• brochure discussing the need for effective hepatitis control

To request any of these materials, or arrange for an audio-visual showing, simply return the coupon below or contact your Abbott Diagnostics representative.
Viral Infections of Humans

Epidemiology, Pathogenesis, and Control
edited by Alfred Evans
Yale University School of Medicine

Viral Infections of Humans provides the most up-to-date coverage of common human viral infections, including a detailed description of the new group of Arenoviruses. More than current, it is the most comprehensive work on the epidemiology, pathogenesis, and control of viral infections ever published. This essential book features a highly organized and uniquely accessible design. It begins with an assessment of epidemiological concepts and methods, surveillance, seroepidemiology, and a review of common viral syndromes and their causes. The volume then covers, in alphabetical order, all the major viral groups infecting humans from arboviruses to varicella/zoster. The final chapters deal with four groups of infections in which a viral etiology is suspected: Burkitt lymphoma; cancer of the nasopharynx; cancer of the cervix; and four chronic infections of the central nervous system (subacute sclerosing panencephalitis, progressive multifocal leukoencephalopathy, Kuru, and Jakob-Creutzfeldt disease).

Because of its strong epidemiologic and clinical orientation, it is well-suited for use in courses on epidemiology, medical microbiology, and clinical infectious diseases. It is also designed as a reference work for physicians in general practice, internal medicine, and pediatrics, and a working guide for public health physicians and health department personnel concerned with the control of viral infections.

BIOSTATISTICIANS/EPIDEMIOLOGISTS

Two positions available (one immediately and one effective July 1, 1977) in the Department of Biostatistics, Medical College of Virginia. Applicants should have Ph.D. with training and/or experience in epidemiology, health care, human genetics, or other areas of medical research. Responsibilities include collaboration/consulting with biomedical researchers (application of statistics to medical and health care problems), direction of M.S. and Ph.D. theses, teaching of service and graduate courses. Salary and rank according to qualifications.

Applicants should send a curriculum vitae to:

Dr. S. James Kilpatrick
Department of Biostatistics
Medical College of Virginia
P. O. Box 923, MCV Station
Richmond, VA 23298
Phone: (804) 770-4065

AN EQUAL OPPORTUNITY EMPLOYER

THE CONTINUING MEDICAL EDUCATION INSTITUTE

Offers a Course on

"THE CHANGING SEASONS OF LIFE: THE PHYSICIAN'S ROLE"

A Continuing Medical Education Institute course on "The Changing Seasons of Life: The Physician's Role" will be held on board the S.S. Rotterdam, sailing from New York to Nassau, Bahamas, and Hamilton, Bermuda, April 23-30, 1977. The course is sponsored by Sea and Shore Seminars, Washington, D.C., the Charles R. Drew Postgraduate Medical School, Office of Continuing Education, and the University of Cincinnati, College of Medicine, Office of Continuing Medical Education. Medical problems of interest to both generalists and specialists will be presented in a continuum, prenatal through geriatric years. Registration fee, $175.00 (after February 23, 1977, $200.00). 25 hours credit in Category I for the Physician's Recognition Award have been AMA approved. For further information on the course, and on additional professional areas for which accreditation will be available, write to: Sea and Shore Seminars, 2100 19th Street N.W., No. 601, Washington, D.C., 20009. Send enquiries to the attention of N. H. Chamberlain.
ASSISTANT STATE EPIDEMIOLOGIST

The Texas Department of Health Resources is seeking a Board-certified or Board-eligible physician epidemiologist to work in the Bureau of Communicable Disease Services, which is being reorganized to emphasize rapid collection, analysis, and dissemination of useful communicable disease incidence data in order to provide local health departments and private physicians with epidemiologic intelligence; to foster meaningful trend analysis; and to provide improved Texas participation in national epidemiologic activities.

Responsibilities include collaboration with fellow epidemiologists in program design, epidemiologic critique, consultative support of EIS Officers, supervision of non-physician epidemiologists, and of long- and short-term investigations of disease problems. The position offered requires residence in the near vicinity of Austin, Texas. Frequent travel to distant regions of Texas is a fundamental requirement. Candidates must become licensed in Texas. Salary range is $34,300–$37,300, depending upon qualifications.

Applicants should contact:

Charles R. Webb, Jr., M.D.
Chief, Bureau of Communicable Disease Services
Texas Department of Health Resources
1100 West 49th Street
Austin, TX 78756
Phone: (512) 458-7207

An Equal Opportunity Employer

EPIDEMIOLOGIST-FACULTY POSITION

The East Carolina University, School of Allied Health and Social Professions, Biostatistics/Epidemiology Program seeks a Ph.D. or Dr.P.H. Epidemiologist. The responsibilities are to provide: undergraduate and graduate instruction in the Allied Health, Medicine, and Nursing curricula; consultation to faculty, students and local communities; and research appropriate to school and regional needs and facilities. The appointment is a 12-month tenure track position funded entirely by state sources. Salary range to $24,000, commensurate with education and experience.

Applicants should send curriculum vitae to:

Ronald L. Thiele, M.D., M.P.H., Dean
School of Allied Health and Social Professions
East Carolina University
Greenville, NC 27834
Phone: (919) 757-6161

A constituent institution of The Consolidated University of North Carolina.
