Contents

Papers
181 Computational operon prediction in whole-genomes and metagenomes
   Syed Shujaat Ali Zaidi and Xuegong Zhang
194 Multi-perspective quality control of Illumina RNA sequencing data analysis
   Quanhu Sheng, Kasey Vickers, Shilin Zhao, Jing Wang, David C. Samuels, Olivia Koues,
   Yu Shyr and Yan Guo
205 ANOS1: a unified nomenclature for Kallmann syndrome 1 gene (KAL1) and anosmin-1
   Fernando de Castro, Ruth Seal and Roberto Maggi on behalf of Group of HGNC consultants for
   KAL1 nomenclature
211 Molecular basis, applications and challenges of CRISPR/Cas9: a continuously evolving tool
   for genome editing
   Ylenia D'Agostino and Salvatore D'Aniello
217 Genomics, proteomics and evolution of dengue virus
   Vivek Dhar Dwivedi, Indra Prasad Tripathi, Ramesh Chandra Tripathi, Shiv Bharadwaj and
   Sarad Kumar Mishra
228 Genetic predictors of long-term graft function in kidney and pancreas transplant patients
   Claire E. Duff and Matthew J. Simmonds
238 Gain-of-function mutagenesis approaches in rice for functional genomics and improvement of
   crop productivity
   Mazahar Moin, Achala Bakshi, Anusree Saha, Mouboni Dutta and P. B. Kirti
