CABIOS CONTENTS

ORIGINAL PAPERS

An iterative algorithm for converting a class II MHC binding motif into a quantitative predictive model
R.R. Mallios

Mapdiff: determining differences between two genomic maps
P.M. Nadkarni

Construction of evolutionary distance trees with TREECON for Windows: accounting for variation in nucleotide substitution rate among sites
Y. Van de Peer and R. De Wachter

'TransMem': a neural network implemented in Excel spreadsheets for predicting transmembrane domains of proteins
P. Aloy, J. Cedano, B. Oliva, F. X. Avilés and E. Querol

Seq-Gen: an application for the Monte Carlo simulation of DNA sequence evolution along phylogenetic trees
A. Rambaut and N.C. Grassly

Grouper-creation of marker sets for multiplexed genotyping
R. Fuchs

ProMSED: protein multiple sequence editor for Windows 3.11/95
A.S. Frolov, I.S. Pika and A.M. Eroshkin

Match-Box server: a multiple sequence alignment tool placing emphasis on reliability
E. Depliereux, G. Baudoux, P. Britteuil, I. Reginster, X. De Bolle, C. Vinais and E. Feytmans

Object-oriented developmental environment for image-analysis applications: implementation for 2D gel electrophoretogram analysis
J. Pánek and J. Vohradský

Prediction of probable genes by Fourier analysis of genomic sequences
S. Tiwari, S. Ramachandran, A. Bhattacharya, S. Bhattacharya and R. Ramaswamy

A Brownian dynamics model for the chromatic fiber
L. Ehrlich, C. Münkel, G. Chirico and J. Langowski

Using explicitly represented biological relationships for database navigation and searching via the World-Wide Web
S. Panzer, L. Cooley and P.L. Miller

P-SEA: a new efficient assignment of secondary structure from Cα trace of proteins
G. Labesse, N. Colloc’h, J. Pothier and J-P. Morlon

The role of long-range interactions in defining the secondary structure of proteins is overestimated
A. Fiser, Z. Dzstpanyi and I. Simon

End-Epi: an application for inferring phylogenetic and population dynamical processes from molecular sequences
A. Rambaut, P.H. Harvey and S. Nee

DnaSP version 2.0: a novel software package for extensive molecular population genetics analysis
J. Rozas and R. Rozas

A new index to find regions showing an unexpected variability or conservation in sequence alignments
J. Dopazo

APPLICATIONS NOTES

A graphical interface for correlated mutations and other protein structure prediction methods
F. Pazos, O. Olmedo and A. Valencia

Software tool for gene mapping: gRanch
Y. Wada, K. Inoue, K. Ohga and H. Yasue
