Bioinformatics
VOLUME 25 NUMBER 9 MAY 1 2009

ORIGINAL PAPERS

Genome analysis
Smoothing waves in array CGH tumor profiles

Sequence analysis
TopHat: discovering splice junctions with RNA-Seq
C. Trapnell, L. Pachter and S.L. Salzberg

DV-Curve: a novel intuitive tool for visualizing and analyzing DNA sequences
Z.-J. Zhang

A consistency-based consensus algorithm for de novo and reference-guided sequence assembly of short reads

Correction for phylogenies, small number of observations and data redundancy improves the identification of coevolving amino acid pairs using mutual information
C. Marino Buslje, J. Santos, J.M. Delfino and M. Nielsen

Applications note
The ruggedness of protein–protein energy landscape and the cutoff for 1/rr potentials
A.M. Ruvinsky and I. A. Vakser

A robust peak detection method for RNA structure inference by high-throughput contact mapping
J. Kim, S. Yi, B. Lim, H. Kim, H. Min, E.-Y. Chung, R. Das and S. Yoon

Gene expression
Sparse linear discriminant analysis for simultaneous testing for the significance of a gene set/pathway and gene selection
M.C. Wu, L. Zhang, Z. Wang, D.E. Chen, Z. and X. Lin

A modified hyperplane clustering algorithm allows for efficient and accurate clustering of extremely large datasets
A. Sharma, R. Podolsky, J. Zhao and R. A. McIndoe

SYSTEMATIC REVIEW

Identifying functional modules using expression profiles and confidence-scored protein interactions
I. Uilitaay and R. Shmar

MIST: Maximum Information Spanning Trees for dimension reduction of biological data sets
B.M. King and B. Tidor

The use of gene ontology evidence codes in preventing classifier assessment bias
M. Rogers and A. Ben-Hur

GS²: an efficiently computable measure of GO-based similarity of gene sets
I. Rogers, D. R. and L. Nakleth

APPLICATIONS NOTE

A web server for inferring the human N-acetyltransferase-2 (NAT2) enzymatic phenotype from NAT2 genotype
I. O. Wu, D. A. Martin, M. C. and G. J. Barton

WSSas: a web service for the annotation of functional residues through structural homologues

dCAS: a desktop application for cDNA sequence annotation
Y. Zhao, J. M. C. Ribeiro, J. M. Anderson and S. Bour

The calibrated population resistance tool: standardized genotypic estimation of transmitted HIV-I drug resistance

continued inside back cover
Contents continued from outside back cover

Phylogenetics
PADRE: a package for analyzing and displaying reticulate evolution
M.Lott, A.Spillner, K.T.Huber and V.Moulton

Structural bioinformatics
PLATINUM: a web tool for analysis of hydrophobic/hydrophilic organization of biomolecular complexes

Gene expression
The tspair package for finding top scoring pair classifiers in R
J.T.Leek

Systems biology
GeNGe: systematic generation of gene regulatory networks
H.Hache, C.Wierling, H.Lehrach and R.Herwig

Illoura™: a software tool for analysis, visualization and semantic querying of cellular and other spatial biological data

Databases and ontologies
SpliceAid: a database of experimental RNA target motifs bound by splicing proteins in humans
F.Piva, M.Giulietti, L.Nocchi and G.Principato

Corrigendum
