SUPPLEMENTAL DATA

SUPPLEMENTAL FIGURE S1. A) Representative photomicrographs of negative control for immunohistochemistry and immunofluorescence. The primary antibody was omitted during staining for CD68+ (A) and MCP-1 (B) demonstrating specificity of the primary antibody as no background staining is observed. Bar = 50 µm; inset magnification, 300x.

SUPPLEMENTAL TABLE S1. Dose-dependent affects of MEHP on body weight (BW), testis weight (TW) and relative testis weight (TW/BW) of Fischer rats. Letters indicate significant differences between treatments at specified time points (p<0.05, Tukey HSD; 1g/kg n=6, 0.75g/kg n=6, 0.5g/kg n=6, control n=13 per time point).

SUPPLEMENTAL TABLE S2. Age-dependent affects of MEHP on body weight (BW), testis weight (TW) and relative testis weight (TW/BW) of Fischer rats. Letters indicate significant differences between treatments at specified time points (p<0.05, Tukey HSD; PND 21 n=4, PND 28 n=6, PND 35 n=6, PND 56 n=3 per time point/treatment).

SUPPLEMENTAL TABLE S3. Age-dependent affects of MEHP on body weight (BW), testis weight (TW) and relative testis weight (TW/BW) of C57BL/6 mice. Letters indicate significant differences between treatments at specified time points (p<0.05, Tukey HSD; PND 21 n=4, PND 28 n=5 per time point/treatment).
Supplemental Figure 1

A. CD68 NEGATIVE

B. MCP-1 NEGATIVE
