Darr et al., Supplemental Figure S1. Sperm motility and viability from Experiment 2 after 60 minutes incubation at 37°C in six modified BWW media: BWW++, BWW---, 5.5mM lactate, 5.5mM pyruvate, 5.5mM glucose, and BWW with 67mM glucose (n = 4). Bars with different superscripts were significantly different (P<0.05). Error bars represent SEM.
