Scientific Commentaries
2 Mutations and mechanism: how PINK1 may contribute to risk of sporadic Parkinson’s disease. S. Gandhi and H. Plun-Favreau
5 Phase matters: cancelling pathological tremor by adaptive deep brain stimulation. C. K. E. Moll and A. K. Engel
8 Flexing footsteps: finding MRI biomarkers of transient ischaemic attack. P. Z. Sun, C. Ayata and E. H. Lo
10 Increased heart rate and energy expenditure in frontotemporal dementia. E. C. Finger

Review Article

Report
27 Clinical behaviour of spinocerebellar ataxia type 12 and intermediate length abnormal CAG repeats in PPP2R2B. A. K. Srivastava, A. Takkar, A. Garg et al.

Original Articles
37 Recessive mutations in the kinase ZAK cause a congenital myopathy with fibre type disproportion. N. Vasli, E. Harris, J. Karamchandani, et al.
146 Molecular magnetic resonance imaging discloses endothelial activation after transient ischaemic attack. A. Quesnault, S. Mantoue de Lameronde, O. Eland, et al.
184 Hypoxia-recovered T cell infiltration promotes neuroinflammation and cognitive decline in a mouse model of tauopathy. C. Laurent, G. Donohue, S. Hanef, et al.

Dorsal column
247 From corticocentrism to leucocentrism or both. J. F. Leijenaar and P. Scheltens

Letters to the Editor
e1 Carl Gustav Jung and the psychobiology of schizophrenia. F. A. Greco and C. K. Deutsch
e2 Pupil area and photopigment spectral sensitivity are relevant to study of migraine photophobia. O. A. Mahroo
e3 Reply: Pupil area and photopigment spectral sensitivity are relevant to study of migraine photophobia. R. Burstein
e5 Reply: Contributions of visual and motor signals in cervical dystonia. A. C. Shekh, O. S. Zin, J. D. Crawford et al.
e6 High impact research investigating the effects of repetitive head injury. L. Lyon
