Subscriptions
A subscription to Brain comprises 12 issues. Prices include postage by surface mail, or for subscribers in the USA and Canada by airfreight, or in India, Japan, Australia and New Zealand, by Air Speeded Post. Airmail rates are available on request. Brain Advance Access contains papers that have been finalised, but have not yet been included within an issue. Advance Access is updated weekly.
Annual Subscription Rate (Volume 140, 12 issues, 2017)
Institutional - Academic/Non profit only
Print edition and site-wide online access: £924/$1848/
Site-wide online access only: £618/$1236/
Print edition only: £851/$1703/
Institutional - Corporate
Site-wide online access only: £772/$1545/
Print edition only: £1064/$2129/
Personal
Print and online: £310/$620/
Print edition: £92/$184/
Site-wide online access only: £772/$1545/
Print edition only: £1064/$2129/

In Japan, please contact: Journals Customer Services, Oxford University Press, 4-5-10-8F, Shiba, Minato-ku, Tokyo, 108-8386 Japan. Email: custserv.jp@oup.com. Tel: (03) 5444 5858. Fax: (03) 3454 2929.
2521 Editorial.
D. M. Kullmann

2522 Chemogenetic management of
neuropathic pain.
A. Basbaum

2525 Connectome-based models of the
epileptogenic network: a step towards
epileptomics?
A. Bernasconi

2527 Spreading depolarization and acute
ischaemia in subarachnoid haemorrhage:
the role of mass depolarization waves.
S. Ghoshal and J. Claassen

2530 Monitoring clinical progression with
mitochondrial disease biomarkers.
H. E. Steele, R. Horvath, J. J. Lyon, et al.

2541 Novel insights in the disease biology
of mutant small heat shock proteins in
neuromuscular diseases.

2550 Biallelic mutations in the homeodomain
of NKX6-2 underlie a severe
hypomyelinating leukodystrophy.

2557 Chronic non-freezing cold injury results
in neuropathic pain due to a sensory
neuropathy.

2570 Using an engineered glutamate-gated
chloride channel to silence sensory
neurons and treat neuropathic pain at
the source.

2586 Mutations in DNM1L, as in OPA1, result
in dominant optic atrophy despite
opposite effects on mitochondrial fusion
and fission.

2597 WDR81 mutations cause extreme
microcephaly and impair mitotic
progression in human fibroblasts and
Drosophila neural stem cells.

2610 Mutations of AKT3 are associated with
a wide spectrum of developmental
disorders including extreme

2623 Mammalian target of rapamycin complex
I activation sensitizes human glial
cells to hypoxia-induced cell death.
S. Ghoshal and J. Claassen

2630 Anatomic consistencies across
epilepsies: a stereotactic-EEG informed
high-resolution structural connectivity
study.

2637 Migraine and risk of stroke: a national
population-based twin study.
M. Lantz, J. Sieurin, A. Sjölander, et al.

2646 Genetic variants influencing elevated
myeloperoxidase levels increase risk of
stroke.
A. W. Haines, A. J. Beagle, et al.

2653 Glymphatic MRI in idiopathic normal
pressure hydrocephalus.
C. J. Bajada, B. Banks, M. A. Lambon Ralph, et al.

2663 Distinct spatiotemporal patterns of
neuronal functional connectivity in
primary progressive aphasia variants.

2673 Mutations in PRUNE1 cause
secondary microcephaly.

2684 Reply: PRUNE1: a disease-causing gene for
secondary microcephaly.
M. Lantz, J. Sieurin, A. Sjölander, et al.

2694 On assessing neurofeedback
effects: should double-blind replace
neurophysiological mechanisms?

2704 Book Review
C. Gardner-Thorpe

2722 A ventral glomerular deficit in Parkinson’s
disease revealed by whole effector bulb
reconstruction.
B. Zapiec, B. V. Dieriks, S. Tan, et al.

2737 Distinct spatiotemporal patterns of
neuronal functional connectivity in
primary progressive aphasia variants.

2750 Reconnecting with Joseph and Augusta
Dejerine: 100 years on.
C. J. Bajada, B. Banks, M. A. Lambon Ralph, et al.

2760 A singular person with multiple interests.
C. Gardner-Thorpe

Letters to the Editor

2761 PRUNE1: a disease-causing gene for
secondary microcephaly.

2762 On assessing neurofeedback
effects: should double-blind replace
neurophysiological mechanisms?
M. Schabus

2763 Mutations in MCM3AP cause
Charcot-Marie-Tooth neuropathy with
variable clinical presentation.
M. Karakaya, N. Mazaheri, I. Polat, et al.

2764 On assessing neurofeedback
effects: should double-blind replace
neurophysiological mechanisms?
M. Schabus

2765 Biallelic MCM3AP mutations cause
Charcot-Marie-Tooth neuropathy with
variable clinical presentation.
M. Karakaya, N. Mazaheri, I. Polat, et al.

2766 The L444P Gba1 mutation enhances
alpha-synuclein induced loss of nigral
dopaminergic neurons in mice.
