Corrigendum

Fumonisin B₁ dosimetry in relation to cancer initiation in rat liver

by W.C.A.Gelderblom, M.E.Cawood, S.D.Snyman and W.F.O.Marasas

The wrong EDL values were given in the thirteenth line of the Abstract. The complete sentence should read:

Over a period of 14 days the amount of FB₁ required for cancer initiation is $23.3 < \text{EDL} < 33.3$ mg FB₁/100 g body wt.
