Supplemental Figure S1. Subdivisions of the auditory cortex under the current nomenclature (top) and that of Pandya and colleagues (bottom). The top view follows the conventions of Figure 1 in the main text and is more schematic and stylized than the bottom figure (modified from Galaburda and Pandya, 1983). Current area labels are shown in bold blue text on both figures (see Table of Abbreviations in main text; Hackett 2011; Saleem and Logothetis, 2012). The original labels of Galaburda and Pandya are in black text. The table at the right proposes possible equivalences between cortical areas under the two systems, but should not be interpreted as an exact mapping.
