- **Cyp11b2**
- **Cyp17a1**
- **Hsd3b1**
- **Cyp11a1**
- **Star**
- **Cyp21a1**
Supplemental Fig. 1. Microarray scatter plot showing pooled data of transcripts involved in adrenal steroidogenesis from 4 zona glomerulosa (zG) and 4 zona fasciculata (zF) samples. Each spot indicates a unique probe for Star, Cyp11a1, Hsd3b1, Cyp21a1, Cyp11b2 and Cyp17 transcripts based on normalized microarray data. A dot outside of the parallel lines represents a transcript with greater than two-fold differences in expression.
