DEPARTMENT OF VETERANS AFFAIRS
OFFICE OF RESEARCH AND DEVELOPMENT
BIOMEDICAL LABORATORY RESEARCH & DEVELOPMENT SERVICE

2016 William S. Middleton Award
presented to:
Stavros C. Manolagas, M.D., Ph.D.
Central Arkansas Veterans Healthcare System, Little Rock, AR

The Middleton Award is the Biomedical Laboratory Research and Development Service’s highest scientific honor, awarded annually to a senior VA investigator for accomplishments in areas of prime importance to the VA’s research mission.

Dr. Manolagas was honored for his ground-breaking contributions to our knowledge of the pathophysiologic mechanisms underlying osteoporosis and other metabolic bone diseases, which has had a broad impact on the clinical care of Veterans and the population at large. The award also recognizes his exemplary record of service to the VA and to the biomedical profession.

NEW BENEFITS IN ENDOCRINE SOCIETY PUBLISHING

OUR PRESTIGIOUS COLLECTION OF JOURNALS IS NOW AVAILABLE ON A POWERFUL NEW WEB PLATFORM, OFFERING:

• EASIER NAVIGATION – Timely, relevant content, such as Editor’s Choice and Advance Article, is easily accessible from the homepage
• BETTER SEARCH FUNCTION – Search across all Endocrine Society journals and build topical queries based on filters and keywords
• OPTIMIZED ARTICLE VIEW – Article display that is HTML and mobile-friendly; features that allow you to navigate between figures, tables, results, and conclusions
• AUTHOR DISCOVERABILITY TOOLS – We now offer Kudos™ and Altmetric™ to help improve citations and increase readership, while also tracking online activity each article receives

**Pediatric Obesity**
— Assessment, Treatment, and Prevention

A NEW STANDARD FOR CARE

**AVAILABLE NOW**

The Latest Clinical Practice Guideline Recommends:

- Children or teens with BMI ≥ the 85th percentile should be evaluated for related conditions such as metabolic syndrome and diabetes.
- Youth being evaluated for obesity do not need to have their fasting insulin values measured because it has no diagnostic value.
- About 7 percent of children with extreme obesity may have rare chromosomal abnormalities or genetic mutations.
- Specific genetic testing when there is early onset obesity (before 5 years old).

Peer-reviewed and developed by a team of experts, the Society’s Clinical Practice Guidelines provide the highest quality, actionable recommendations for physicians in a clinical setting.
