

Additional file 1 — Example of Tentacle quantification output

An example of Tentacle's quantification output. A plain text file with five columns (one description per line):

```
reference_annotation:start:stop:strand
counts
median coverage
average coverage
coverage standard deviation
```

In the following output, contigs 4 and 5 have been spiked with randomly drawn reads, which are drawn from the same contigs to produce an additional 5x coverage of these two contigs.

contig3_c3:0:562:+	8	1.0	1.08185053381	1.4491590858
contig2_c2:0:632:+	9	1.0	1.08227848101	0.785269363391
contig1_c1:0:623:+	11	1.0	1.341894061	1.13613956271
contig5_c5:0:2015:+	150	6.0	5.65756823821	2.5727838843
contig4_c4:0:1884:+	155	6.0	6.25265392781	2.81183961158
