**Supplementary Table SIV Who initiated contact?—  
Recipients with providers (Phase I).**

	<b>Provider Family 1</b>	<b>Provider Family 2</b>	<b>Provider Family 3</b>
Me	9	1	0
My partner	0	0	0
Me and my partner together	10	4	1
Provider family	7	0	0
Other	1	0	0

It is of note here that slightly more recipients initiated contact than providers, although the small numbers do not merit any firm conclusions to be drawn from this. Given this very marginal difference, it can be concluded that there is no significant difference between groups in this regard.
