Supplementary Figure S3 Grandmaternal smoke exposed (GM-SE) and great-grandmaternal smoke exposed (GG-SE) have no effect on oocyte size. Germinal vesicle (GV) oocyte size in (A) GM-SE and (B) GG-SE GV oocytes at 4 weeks; \( P = 0.2392 \) and 0.9946, respectively, Student’s t-test. Box plots show mean (centerline) with box outline 25–75th percentiles, whiskers 10–90th percentiles and data points representing outliers. \( n \) = number of oocytes examined from three animals.
