

Supplementary Figure S2 CLBR for women* who initiated ART treatment for the second ART-conceived live birth with a new ovarian stimulation cycle (total women: 4128). (a) Conservative CLBR. (b) Optimal CLBR. *Women who conceived their first live birth following ART treatment performed in 2009–2013 and followed up for ART treatments performed to December 2015. Note: CLBR was calculated for a complete cycle only when at least 50 women had commenced the cycle
