Corrigendum

International Journal of Neuropsychopharmacology
Volume 4, Number 1, pp. 47–64

Mood stabilizers regulate cytoprotective and mRNA-binding proteins in the brain: long-term effects on cell survival and transcript stability

G. Chen, L. D. Huang, W. Z. Zeng and H. K. Manji

The sections intended for inclusion under Materials and Methods were mistakenly separated. The three paragraphs on p. 60 should have appeared immediately in front of the section on p. 49, entitled ‘Second round of RT–PCR mRNA differential-display studies to identify AU-rich transcripts whose expression is regulated by lithium or valproate’.

The publisher apologises to the authors, readers and CINP for this unfortunate error.
