Latest Clinical Practice Guideline Recommends Continuous Glucose Monitors (CGMs)

Read “Diabetes Technology — Continuous Subcutaneous Insulin Infusion Therapy and Continuous Glucose Monitoring in Adults.”

State-of-the-art guidelines based on expert recommendations:

- Maintain better control of blood sugar and experience fewer episodes of hypoglycemia with CGMs
- Use of insulin pumps over daily injections in individuals with Type 1 diabetes who have not met their A1C goals
- Thorough device usage education and training for patients and healthcare providers
- Call for Medicare coverage to extend CGM technology to older adults with Type 1 diabetes

Peer-reviewed and developed by a team of experts, the Society’s Clinical Practice Guidelines provide the highest quality, actionable recommendations for physicians in a clinical setting.
