

Supplemental Data SD4: Data Supporting Tests of Network and Dominance Measures vs. Mating Tactic

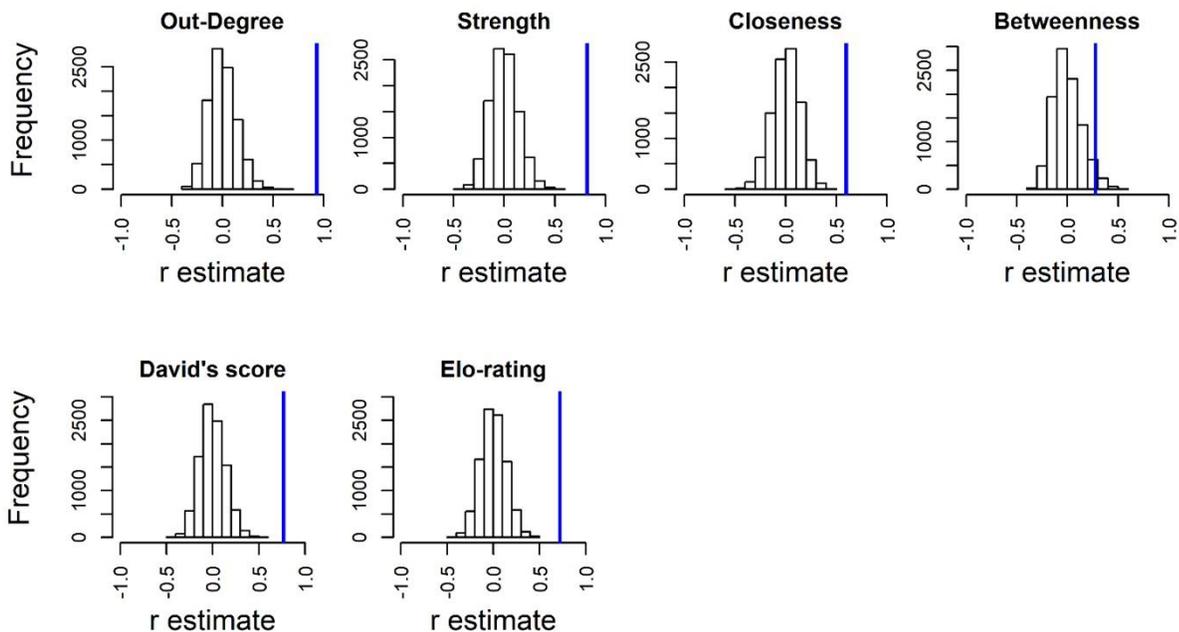

Randomization Histograms for Network and Dominance Measures vs. Mating Tactic

Histograms of correlation coefficients (r) for permutations of ID. Randomization procedure was conducted using social network measures (top row) and traditional dominance measures (bottom row). The blue line indicates the observed correlation coefficient (r) for each test.

Number of Females Tended Histograms: Participation in Tending Tactic

Number of Satellite Males Histograms: Participation in Tending Tactic

Number of Tending Males Attended (Satellited) Histograms: Participation in Alternative Satellite Tactic
