Supplemental Figure 1. Body weights of rats orally administered EPA-Et or DHA-Et daily for 28 d (Part 1). Values plotted are means ± SEM, n = 8 (group C) or n = 6 (groups E and D). The solid arrow shows the start of EPA-Et or DHA-Et administration. C, normal rats administered saline; D, normal rats administered DHA-Et; E, normal rats administered EPA-Et; Et, ethyl ester.
