Supplemental Figure 1. Mean ± SEM ratings of A) hunger, B) fullness, C) desire for something sweet, D) comfort, E) thirst and F) nausea on 100 mm visual analogue scales from before treatment (time 0) till 90 minutes after the treatment. Treatments consisted of oral exposure with modified sham feeding (MSF) and at the same time infusion of a 500 mL gastric load (GL) via a nasogastric tube. Healthy men (22 ± 3 yr, 23 ± 1 kg/m²) received in randomized order: 1 min MSF and a 100 kcal GL (n=24); 8 min MSF and a 100 kcal GL (n=26); 1 min MSF and a 700 kcal GL (n=26); 8 min MSF and a 700 kcal GL (n=25); a control condition with no MSF and water as GL (n=26).
