SUPPLEMENTAL FIGURE 3. Correlations between the composite appetite score postprandial area under the curve (AUC) and energy intake (A), plasma GLP-17-36 AUC and GIP1-42 AUC (B), and GLP-17-36 AUC and the composite appetite score AUC. Data are expressed as the difference from the control trial (ΔCON); n = 20 for A, n = 19 for B and C. GIP1-42, glucose-dependent insulinotropic polypeptide1-42; GLP-17-36, glucagon-like peptide-17-36.
