Legend for Supplementary figures

Isolate of species from the series *Viridicata* from *Penicillium* subgenus *Penicillium* cultivated on CYA and YES agar (Samson *et al.*, 2000) after incubation for 7 d in the dark at 25 °C. Photographed under artificial daylight, the images are grouped into species and named with their culture collection number in the IBT collection at BioCentrum-DTU, Technical University of Denmark and the cultivation media.
