long noncoding RNAs

- cell morphogenesis
- carbohydrate metabolic process
- generation of precursor metabolites and energy
- DNA metabolic process
- mRNA processing and translation
- protein folding
- protein complex assembly
- protein modification process
- cellular amino acid metabolic process
- protein targeting
- lipid metabolic process
- sulfur compound metabolic process
- nucleocytoplasmic transport
- response to stress
- mitochondrion organization
- plasma membrane organization
- cytoskeleton organization
- vacuolar transport
- chromosome segregation
- mitosis
- cell adhesion
- signal transduction
- cell-cell signaling
- aging
- cell death
- cell proliferation
- catabolic process
- embryo development
- vesicle-mediated transport
- ribonucleoprotein complex assembly
- cell differentiation
- extracellular matrix organization
- cytoskeleton-dependent intracellular transport
- growth
- ribosome biogenesis
- homeostatic process
- pigmentation
- symbiosis, encompassing mutualism through parasitism
- anatomical structure organization involved in morphogenesis
- cell motility
- neurological system process
- cofactor metabolic process
- chromosome organization
- cell division
- protein maturation
- transmembrane transport
