SURVEY AND SUMMARY
Transcriptional regulation of human DNA repair genes following genotoxic stress: trigger mechanisms, inducible responses and genotoxic adaptation
M.Christmann and B.Kaina 8403–8420

COMPUTATIONAL BIOLOGY
MREdictor: a two-step dynamic interaction model that accounts for mRNA accessibility and Pumilio binding accurately predicts microRNA targets
D.Incarnato, F.Neri, D.Diamanti and S.Oliviero 8421–8433

Evidence of direct complementary interactions between messenger RNAs and their cognate proteins
A.A.Polyansky and B.Zagrovic 8434–8443

Minimal genome encoding proteins with constrained amino acid repertoire
O.Tsoy, M.Yurieva, A.Kucharavy, M.O’Reilly and A.Mushegian 8444–8451

A comprehensive gene regulatory network for the diauxic shift in Saccharomyces cerevisiae

Integrated analysis of genome-wide DNA methylation and gene expression profiles in molecular subtypes of breast cancer

GENE REGULATION, CHROMATIN AND EPIGENETICS
Analysis of epigenetic stability and conversions in Saccharomyces cerevisiae reveals a novel role of CAF-I in position-effect variegation

The PRP6-like splicing factor STA1 is involved in RNA-directed DNA methylation by facilitating the production of Pol V-dependent scaffold RNAs

Integrative analysis of tissue-specific methylation and alternative splicing identifies conserved transcription factor binding motifs
J.Wan, V.F.Oliver, H.Zhu, D.J.Zack, J.Qian and S.L.Merbs 8503–8514

Pin1 promotes GR transactivation by enhancing recruitment to target genes
T.M.Poolman, S.N.Farrow, L.Matthews, A.S.Loudon and D.W.Ray 8515–8525

CCAR1 promotes chromatin loading of androgen receptor (AR) transcription complex by stabilizing the association between AR and GATA2

SIRT6 exhibits nucleosome-dependent deacetylase activity
R.Gil, S.Barth, Y.Kanfi and H.Y.Cohen 8537–8545

Protein–DNA binding dynamics predict transcriptional response to nutrients in archaea

Continued
GENOME INTEGRITY, REPAIR AND REPLICATION

Modulation of base excision repair of 8-oxoguanine by the nucleotide sequence
J. Allgayer, N. Kitsera, C. von der Lippen, B. Epe and A. Khobta
8559–8571

The ubiquitin specific protease USP34 promotes ubiquitin signaling at DNA double-strand breaks
S. M. H. Sy, J. Jiang, W. S. O, Y. Deng and M. S. Y. Huen
8572–8580

Conformational changes of the phenyl and naphthyl isocyanate-DNA adducts during DNA replication and by minor groove binding molecules
S. -i. Nakano, Y. Uotani, Y. Sato, H. Oka, M. Fujii and N. Sugimoto
8581–8590

GENOMICS

Global identification of conserved post-transcriptional regulatory programs in trypanosomatids
H. S. Najafabadi, Z. Lu, C. MacPherson, V. Mehta, V. Adoue, T. Pastinen and R. Salavati
8591–8600

MOLECULAR BIOLOGY

BRCA1 is a key regulator of breast differentiation through activation of Notch signalling with implications for anti-endocrine treatment of breast cancers
8601–8614

Target recognition, RNA methylation activity and transcriptional regulation of the Dictyostelium discoideum Dnmt2-homologue (DnmA)
8615–8627

Carboxy terminal modifications of the P0 protein reveal alternative mechanisms of nuclear ribosomal stalk assembly
R. Francisco-Velilla, M. Remacha and J. P. G. Ballesta
8628–8636

Transactivation specificity is conserved among p53 family proteins and depends on a response element sequence code
8637–8653

NUCLEIC ACID ENZYMES

Early steps of active DNA demethylation initiated by ROS1 glycosylase require three putative helix-invading residues
8654–8664

RNA

HnRNP A1 controls a splicing regulatory circuit promoting mesenchymal-to-epithelial transition
S. Bonomi, A. di Matteo, E. Buratti, D. S. Cabianca, F. E. Baralle, C. Ghigna and G. Biamonti
8665–8679

A competitive regulatory mechanism discriminates between juxtaposed splice sites and pri-miRNA structures
C. Mattioli, G. Pianigiani and F. Pagani
8680–8691

miRISC recruits decapping factors to miRNA targets to enhance their degradation
T. Nishihara, L. Zekri, J. E. Braun and E. Izaurralde
8692–8705

HCV IRES interacts with the 18S rRNA to activate the 40S ribosome for subsequent steps of translation initiation
A. A. Malygin, O. A. Kossinova, I. N. Shatsky and G. G. Karpova
8706–8714

Conservation of RNA chaperone activity of the human La-related proteins 4, 6 and 7
R. H. Hussain, M. Zawawi and M. A. Bayfield
8715–8725

Synthetic tolerance: three noncoding small RNAs, DsrA, ArcZ and RprA, acting supra-additively against acid stress
S. M. Gaida, M. A. Al-Hinai, D. C. Indurthi, S. A. Nicolaou and E. T. Papoutsakis
8726–8737

CONTENTS (Continued)

STRUCTURAL BIOLOGY

S Controlling the stoichiometry and strand polarity of a tetramolecular G-quadruplex structure by using a DNA origami frame
A.Rajendran, M.Endo, K.Hidaka, P.Lan Thao Tran, J.-L.Mergny and H.Sugiyama 8738–8747

S Structural studies of p53 inactivation by DNA-contact mutations and its rescue by suppressor mutations via alternative protein–DNA interactions
A.Eldar, H.Rozenberg, Y.Diskin-Posner, R.Rohs and Z.Shaakked 8748–8759

S Architecturally diverse proteins converge on an analogous mechanism to inactivate Uracil-DNA glycosylase

S Solution structure of human P1¢P2 heterodimer provides insights into the role of eukaryotic stalk in recruiting the ribosome-inactivating protein trichosanthin to the ribosome

SYNTHETIC BIOLOGY AND CHEMISTRY

S RNA duplexes with abasic substitutions are potent and allele-selective inhibitors of huntingtin and ataxin-3 expression

METHODS ONLINE

S,M Quantitative set analysis for gene expression: a method to quantify gene set differential expression including gene-gene correlations
G.Yaari, C.R.Bolen, J.Thakar and S.H.Kleinstein e170 (11 pp.)

S,M Concordance of gene expression in human protein complexes reveals tissue specificity and pathology
D.Börnigen, T.H.Pers, L.Thorrez, C.Huttenhower, Y.Moreau and S.Brunak e171 (12 pp.)

S,M Automated and assisted RNA resonance assignment using NMR chemical shift statistics

S,M Targeted resequencing of HIV variants by microarray thermodynamics
W.W.Hadiwikarta, B.Van Dorst, K.Hollanders, L.Stuyver, E.Carlon and J.Hooyberghs e173 (9 pp.)

S,M In-gel probing of individual RNA conformers within a mixed population reveals a dimerization structural switch in the HIV-1 leader

S,M Universal digital high-resolution melt: a novel approach to broad-based profiling of heterogeneous biological samples

S,M In situ visualization of telomere elongation patterns in human cells
M.E.Dioliati, B.A.Cimini, R.Kageyama, F.A.Charles and B.A.Stohr e176 (9 pp.)

S,M Dicodon monitoring of protein synthesis (DiCoMPS) reveals levels of synthesis of a viral protein in single cells
S.Barhoom, I.Farrell, B.Shai, D.Dahary, B.S.Cooperman, Z.Smilansky, O.Elroy-Stein and M.Ehrlich e177 (10 pp.)
