

Supplemental Table 1. Projected number of Latino undocumented immigrants by age under the status quo scenario, 2018-2038 (1,000s)

	0-39	40-54	55-64	65-74	75+	Total
2018	4,934	3,148	330	100	61	8,573
2019	4,771	3,238	390	116	49	8,563
2020	4,604	3,267	488	144	61	8,564
2021	4,445	3,299	572	175	73	8,564
2022	4,295	3,332	642	210	87	8,565
2023	4,155	3,365	698	247	102	8,568
2024	4,026	3,393	750	285	118	8,571
2025	3,942	3,336	823	329	147	8,577
2026	3,860	3,281	896	373	179	8,589
2027	3,783	3,228	970	413	213	8,608
2028	3,712	3,178	1,045	453	250	8,638
2029	3,646	3,128	1,087	527	290	8,678
2030	3,631	3,002	1,111	627	358	8,729
2031	3,618	2,888	1,136	723	432	8,797
2032	3,604	2,785	1,164	813	512	8,879
2033	3,589	2,693	1,195	898	599	8,974
2034	3,577	2,608	1,225	989	684	9,082
2035	3,591	2,498	1,224	1,088	802	9,203
2036	3,604	2,399	1,225	1,196	919	9,343
2037	3,614	2,311	1,228	1,314	1,032	9,499
2038	3,623	2,232	1,233	1,441	1,143	9,672

---

Notes: Residual estimate for 2018; projections for 2019-2038. The status quo scenario assumes that rates of mortality, other departures from the undocumented population, and new immigration persist at their current levels, and does not account for economic or policy changes that could potentially impact the size of the undocumented population.

Supplemental Figure 1. Projected number of Latino undocumented immigrants by detailed age under the status quo scenario, 2018 and 2038

Supplemental Table 2. Projected number of Latino undocumented immigrants age 55+ and percentage that aged in place under the status quo scenario, 2018-2038

	Number Age 55+ (1,000s)	% Aged in Place (Arrived Before Age 55)
2018	491	86.6
2019	555	90.8
2020	693	91.9
2021	820	92.4
2022	939	92.8
2023	1,047	92.8
2024	1,153	92.9
2025	1,299	93.1
2026	1,448	93.2
2027	1,596	93.4
2028	1,748	93.5
2029	1,904	93.6
2030	2,096	93.8
2031	2,291	93.9
2032	2,489	94.0
2033	2,692	94.1
2034	2,898	94.1
2035	3,114	94.2
2036	3,340	94.3
2037	3,574	94.4
2038	3,817	94.5

Notes: Residual estimate for 2018; projections for 2019-2038. The status quo scenario assumes that rates of mortality, other departures from the undocumented population, and new immigration persist at their current levels, and does not account for economic or policy changes that could potentially impact the size of the undocumented population.
