Bronchoalveolar lavage in pulmonary tuberculosis: a decision analysis approach

A. Mohan et al., Q J Med 1995; 88:269–76

The following is the correct version of Figure 1 of the above paper:

Figure 1. Decision analysis tree for the evaluation of a patient with sputum smear negative pulmonary tuberculosis. Small square indicates a decision node. Small circle indicates a chance node. Probability bindings are represented below each event. Utility bindings are depicted at the end of each path. Numbers in balloons denote averaged-out outcomes connected to each node.
